

**Reactivating historical collections and
bridging the nature/culture divide through digital curation**

Workshop

23 January 2026

1:30–5:30 p.m.

LMU Munich

Institute of Social and Cultural Anthropology

Room C007

Thiago da Costa Oliveira, whose work crosses filmmaking, photography, curatorial projects and scholarship (<https://thiagocoliveira.com/>), and who is a member of the ‘Pluralising the value of things’ network (<https://www.indigen.eu/projects/affiliated-projects/pluralizing-the-value-of-things>), will visit our institute for a workshop. The aim is to further develop our digital projects, foster cross-fertilisation between the different threads, and plan for the afterlives of our interventions beyond the span of limited projects towards long-term digital archives to be used by others in the future. The format includes the prior circulation of a reading, individual presentations (30 min) and discussions (15 min), a response by Thiago (30 min), and a concluding group discussion (30 min).
